Fitting is a free service so use our expertise to ensure you buy the best possible fitting suit. All you need do is include some of your measurements per the diagram to the left and we will check you have ordered the correct size.

Some important rules about this size chart:

- > A snug fitting suit is better than a loose fitting suit.
- > Your chest should receive priority so it is not too tight
- > If you are in upper limits of height, keep to mid/lower limits of other measurements
- > If you are in lower limits of height, keep to mid/high limits of other measurements
- > Sizes are not consistent between brands, nor even between models of the same brand.
- > Sizes are not consistent between neoprene thickness. A 5mm suit is less flexible than a 3mm suit.
- > Minimum & Maximums provided may be exceeded but you should contact us first for guidance
- > If you are unsure we can help; so email us with your questions.
